I just spoke with (b) (6) and he informed me that all of the materials obtained from the public development authority were returned to them upon closure of the case. The documents were not digitized prior to their return. However, Terry did say that he returned them in new boxes with an inventory. Thus, if no one at the development authority has messed with the contents of the boxes, they should be organized and reasonably available for your needs. Sorry we could not be of more help. Thanks.

Thanks, Karla. Here are the letter and the questions (I don't have the final copy, but I don't believe that the questions changed much, if at all, other than filling in some blanks). I'll ask Mike Sibley, the OSC, for a final copy.

This is no longer an open case for us. It was closed a few months back. (b) (7)(C), (b) (6) took it over after (b) (7)(C), left (I am cc'ing him here). (b) (6) is out for training this week and I am not sure which documents were retained. Would you mind passing along a copy of the letter so that we know which documents you are seeking? (b) (6) and I can then talk next week to see what remains and what we can turn over. Thanks. (7)

Subject: Odessa Biodiesel

(b) (6), (b) (7)(C)

ECL recently send a 104(ee) information request letter to the local county public development authority (PDA), who leased the property in question to Odessa Biodiesel. Their attorney called me (Kris Leefers is out this week) to ask some questions about the letter. Her main question was whether EPA had made copies of the Odessa Biodiesel files that EPA took from the site. She also said that "EPA" returned the files to the PDA. She was hoping that she would not have to rifle through the files to find documents responsive to our info request letter if EPA had made copies.

Is this still an open case/lead for CID? If not, did CID make copies of the documents, and if so, can you share them with Kris? Let me know. Thanks!
